

October 23, 2007

The Honorable Harry Reid
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Mitch McConnell
Minority Leader
United States Senate
Washington, DC 20510

Dear Senators Reid and McConnell:

On behalf of the more than 430 undersigned organizations representing American innovation from all 50 states and the District of Columbia in fields including agriculture, alternative energy, biotechnology, chemicals, computer hardware, computer software, computer networking, cosmetics, entertainment, financial services, food/beverage, health care, heavy industry, life sciences, manufacturing, medical devices, material science, nanotechnology, optics, security, semiconductors, space systems, startup incubation, telecommunications, venture capital, and internet-based businesses, we are writing to raise continuing concerns regarding S. 1145, The Patent Reform Act of 2007.

While we welcome efforts to make improvements to the U.S. patent system, we must make clear our opposition to S. 1145 as approved by the Senate Judiciary Committee. This bill contains provisions that will create uncertainty and weaken the enforceability of validly issued patents. Some of the proposed reform provisions, such as an expanded apportionment of damages, an indefinite post-grant opposition process, excessive venue restrictions, burdensome and expensive mandatory search requirements, and unworkable interlocutory appeal provisions, pose serious negative consequences for continued innovation and American technological leadership in a competitive global economy. In addition, the bill codifies the current inequitable conduct doctrine rather than to make broadly supported reforms to eliminate litigation abuse of the doctrine and gain increases in patent quality.

No compelling case has been made for a bill written in this fashion. It is based on claims of a crisis in the current patent system that does not exist, supported by selective assertions which do not hold up under scrutiny. Importantly, the bill fails to take into account the impact of numerous court decisions and administrative rules that have occurred recently regarding major patent issues. We believe the authors of the legislation must make fundamental changes to the legislation if it is to work for all American innovators, and we urge you not to consider the bill on the Senate floor unless such changes are made.

We remain committed to strengthening the U.S. patent system in ways that will preserve and promote innovation across the broad spectrum of the American economy, and we look forward to working with you in this regard.

Thank you for considering our views in this crucial matter.
